

A SURVEY OF BIG DATA IN COMPUTER VISION

Project Proposal
By Gustavo Monaco

Introduction

This project is a survey of the use of Big Data in the latest available research papers on Computer Vision, for the Massive Storage and Big Data course at UCF. The purpose of this project is to evaluate the different uses of Big Data by researchers in the area of Computer Vision. To accomplish this, we will analyze the research papers freely available through the Computer Vision Foundation, Open Access versions, which are identical to the final published paper, except for a watermark on the first page.

Problem Description

ENUMERATE THE BIG DATA
TECHNOLOGIES AVAILABLE TO
RESEARCHERS IN ANY AREA OF STUDY.

ANALYZE OVER 1,500 RESEARCH PAPERS
PUBLISHED IN 2019, AND FIND BIG DATA
USED BY RESEARCHERS

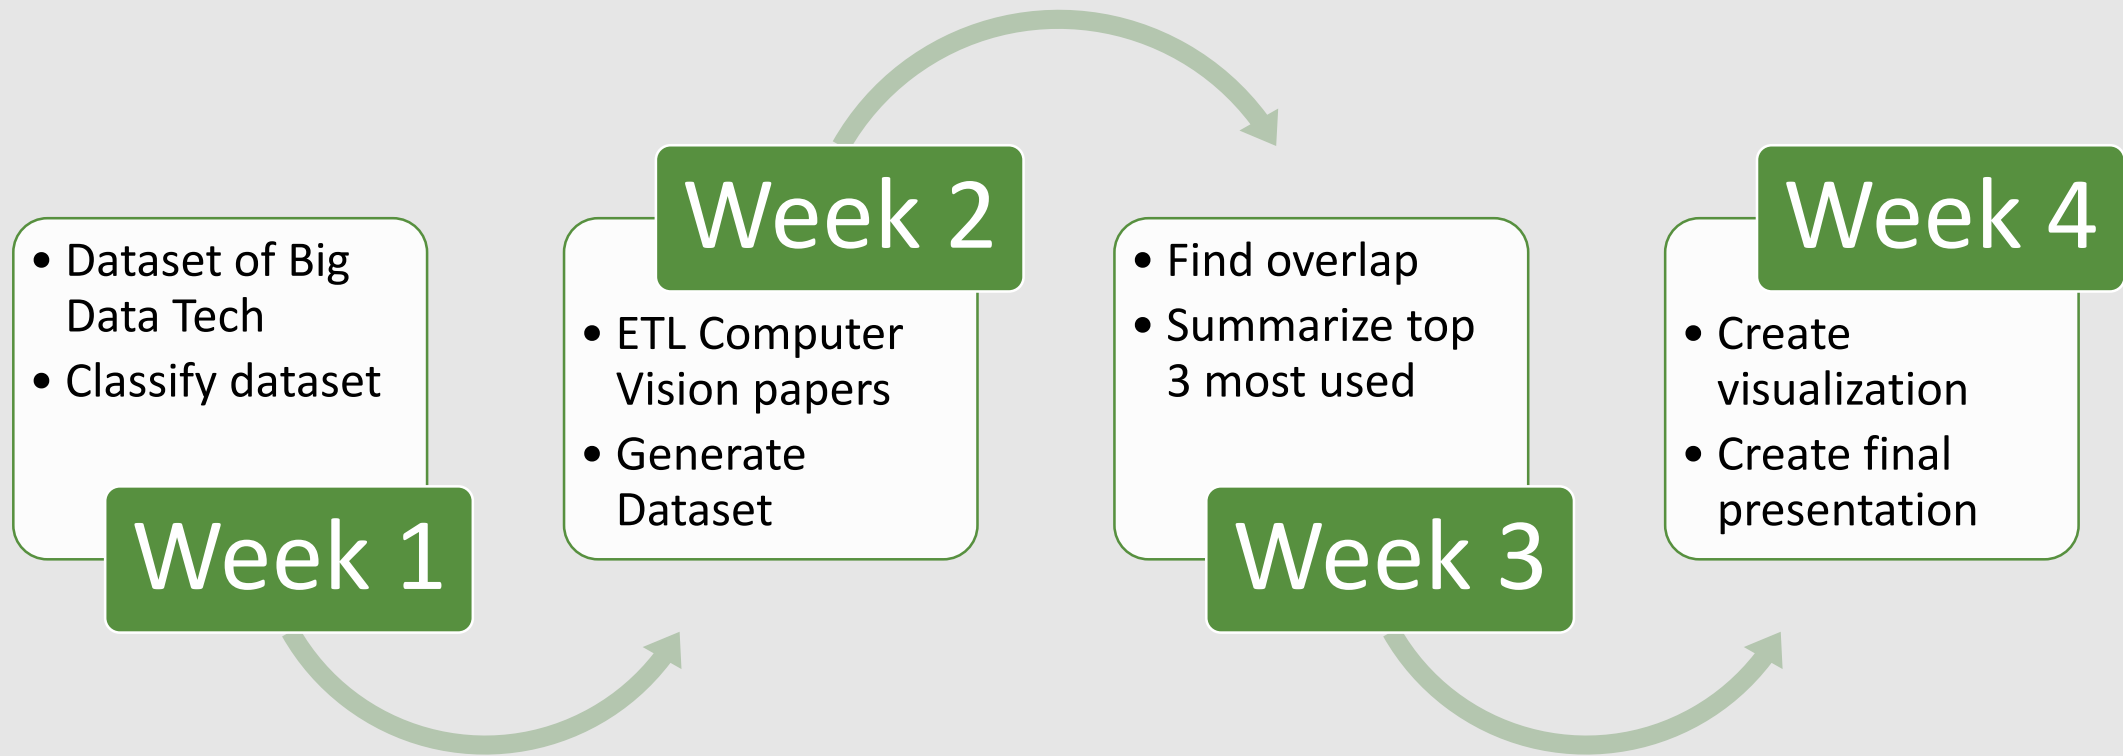

SUMMARIZE WHAT, HOW, WHEN AND
WHERE, OF THE TOP 3 MOST USED
TECHNOLOGIES
